EXPERIENCE

Frontend Developer - Next.js | FroverLabs, Goa | Feb 2025 - Jul 2025

- Tech Stack: Next.js, React.js, Tailwind CSS, Agentic RAG, SEO workflows
- Collaborated on client projects and delivered landing pages with responsive, optimized UIs
- Built frontend components for internal SEO Automation Tool integrated with RAG models for auto-generation of blogs, keywords, and SEO content
- Improved content operations efficiency and contributed to Core Product development

Web Developer Intern | ICS Engineers, Goa | Dec 2024 - Jan 2025

- Built professional portfolio with Admin Dashboard using React.js, Tailwind CSS, Node.js
- Achieved 44% increase in Google reviews and 38% increase in website traffic via SEO optimization

Job Simulation | Lloyds Banking Group Technology Engineering | Jan 2026

- Developed and deployed mortgage calculator using HTML, CSS, JavaScript, and Azure
- Improved code management efficiency by 30% using Git for version control

PROJECTS

Restaurant POS and Menu Management System | menu.crobtechlabs.in | https://github.com/nagesh-merva/Project_Management_Tool

- Full-stack POS system with digital menu, order management, billing, and inventory tracking across multiple outlets
- Multi-tenant backend with isolated databases ensuring data security and scalability; role-based UI for admins, kitchen staff, and customers
- optimized for tablets and mobile POS devices, structured backend APIs following REST best practices, with clean schemas and separation of concerns for long-term maintainability
- Focused on security-first system design, minimizing exposure of internal identifiers, and sanitizing all public-facing data responses

Project Management Tool | pmt-crob.web.app | https://github.com/nagesh-merva/Project_Management_Tool

- Full-stack system with tasks, milestones, real-time activity tracking, and goal progress visualization
- Added real-time activity tracking and goal progress visualization to reduce scattered workflows
- Delivered a clean, responsive UI, improving productivity and adoption by small teams

Sentiment Analysis System - E-commerce (Hackathon) | <https://github.com/nagesh-merva/Interspirit-Hackathon-Decipher/>

- Built an AI-driven sentiment analysis platform to monitor tweets and Instagram comments for brand reputation tracking and PR risk detection.
- Integrated a BERT-based NLP model to classify sentiments and detect fine-grained emotions from social media content.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline to enhance contextual understanding and improve emotion & sentiment scoring accuracy.

CERTIFICATIONS AND ACHIEVEMENTS

- Frontend Development with React (FreeCodeCamp)
- Google IT Automation with Python (Coursera)
- Meta Marketing Science (Meta)
- Hackathon Finalist at Cultrang IIT Goa and Odoo India
- Web Dev Lead at Google Developers Group, GOA
- Technical Lead at ECELL, GEC
